

STACK OVERFLOW DEVELOPER SURVEY 2019

Rion Sato

December 21th, 2023

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Data contextualization and analysis goal.
- Methodology description.
 - Data gathering.
 - Data analysis.
 - Data visualizations.
- Results presentation supported with graphs and trends.
- Discussion of overall findings and implications regarding the results previously exposed.
- Final conclusions of the carried-out research.

INTRODUCTION

- Stack Overflow's annual Developer Survey is the largest and most comprehensive survey of people who code around the world.
- Results don't represent everyone in the developer community evenly.
- Nearly 90,000 developers.
- Trends to predict where the developers are going.
- Characterization of developers around the globe.

METHODOLOGY

- Collect survey data & explore its content
 - Web Scraping
 - APIs.
 - Request library.
- Data Wrangling
- Exploratory data analysis
 - Analyzing data distribution.
 - Handling outliers.
 - Correlations.
- Data Visualization
 - Highlight distribution of data, relationships, the composition and comparison of data.
- Dashboards

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 LanguageDesireNextYear

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- The top two, JavaScript and HTML/CSS, keep it in place.
- Python is growing rapidly and is in third place.
- PHP will no longer be in the top 10.

Implications

- Demand for Python has increased as data utilization has become commonplace in the business domain.
- The proliferation of the Node.js platform has reduced the demand for PHP, as JavaScript can now be used on the server side.

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- PostgreSQL, MongoDB, and Redis have grown to become the Top 3.
- MySQL's ranking is dropping, but demand is still there.
- Firebase is also growing.

Implications

- PostgreSQL is growing in popularity due to its scalability, ease of querying, and support for many different types of data.
- Firebase is considered to be growing because it does not require back-end processing.

DASHBOARD

https://github.com/Rion-Sato/Peer_Grated_Assignment_Dashboards/blob/main/Peer-Graded%20Assignment.pdf

Note:

This is a GitHub link that includes a PDF of the Dashboard I created with Cognos Analytics due to an issue with IBM Cloud not being available.

Please grade the application based on this PDF.

I have read officially on the discussion forum that there is no point deduction for using this method.

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript widely used and HTML/CSS getting popular.
- Over 90% young male developers.
- Developers mostly located in developed countries.

Implications

- JavaScript and HTML/CSS web frames gaining followers.
- Global polarization of developers location and gender.
- Young developers without postgrad studies on its majority.

CONCLUSION

- Developers are people with very marked characteristics.
- A good idea of popularity trends of different tools, platforms and languages can be obtained.
- There is a job to be done to spread accessibility of this labor market to countries in development.
